Eloi Ngabonziza

Full Stack Developer | eloingabonziza@gmail.com | (364) 203-4090 | Bowling Green, KY | LinkedIn | GitHub | Portfolio

Summary

Full Stack Developer building React and Next.js applications wired to REST APIs, Firebase Auth and Firestore, Stripe, and Node.js and Express services, deployed on Vercel. Built Skinstric AI's skin analysis flow end-to-end, from image upload through the OpenAI Vision API to parsed results, as a Frontend Developer Intern. BASC in Computer and Information Sciences (WKU, 2025). Available immediately for full-time full-stack roles across the US.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, React, Next.js, Tailwind CSS, Redux
Backend & Data: Node.js, Express, REST API design and integration (fetch, Axios), Firebase Auth and Firestore, Stripe (payments, webhooks), Next.js Server Components, API caching
Tooling: Git, GitHub pull-request workflow, Vercel, Vite, npm, Postman, Chrome DevTools

Experience

Skinstric AI Dec 2025 – Apr 2026
Frontend Developer (Internship)

- When the product had no customer-facing screens, built the real-time skin analysis flow in Next.js and TypeScript on the OpenAI Vision API, from image upload to parsed results, achieving 98% detection accuracy across diverse skin conditions in production.
- Implemented the image pipeline from client-side capture and upload through the Vision API request to responses parsed into recommendation data, with loading and error handling on every request and no placeholder data in the live flow.
- Cut analysis wait from 3.4s to 1.6s by fetching in Next.js Server Components and deferring animation assets, reaching sub-2-second analysis time.
- Designed a modular Tailwind component library (14 components) for product displays so recommendation layouts could be swapped for A/B tests without rework, shipped through reviewed pull requests.

Dorman Products (Portland, TN) Feb 2024 – Mar 2025
Warehouse Associate

- Picked and packed 300+ parts orders a day from RF-scanner pick lists at 99.5% accuracy, flagging damaged stock before it shipped and holding the daily target every month.
- Ran inventory cycle counts across 2,000+ bin locations and corrected location errors in the warehouse system, bringing counted-versus-system accuracy from 96% to 99%.

Macy's Logistics & Operations Jul 2019 – Dec 2023
Warehouse Associate / Staff Trainer

- Picked, packed, and labelled orders through five holiday peaks at double normal volume, and trained 15+ new associates on pick procedures and forklift safety, cutting onboarding time from two weeks to one.

Projects

Summarist - Audiobook SaaS Platform | Live Demo | GitHub
Next.js, React, Firebase, Stripe, REST APIs

- Built a book-summary platform with Firebase email and Google authentication, Stripe subscription gating, search with a route per book, and REST-fed text and audio playback; debounced search cut API calls by 80% while typing.

Weatherly - Weather App with Node Backend | Live Demo | GitHub
Node.js, Express, REST APIs, JavaScript

- Built an Express API that proxies and caches a third-party weather service with a React client, keeping repeat city lookups under 50ms and the API key off the client.

Netflix Clone - Streaming UI | Live Demo | GitHub
Next.js, Firebase Auth, TMDb API

- Built a streaming UI with TMDb titles, Firebase Auth, and trailer playback, with the full sign-up to playback flow working in production.

Education

Frontend Simplified Nov 2025 – Sep 2026
Frontend Engineering Programme (React, Next.js, TypeScript, Tailwind CSS, Node.js, Express)

Western Kentucky University Aug 2023 – Dec 2025
Bachelor of Applied Science, Computer Information Technology

Southcentral Kentucky Community and Technical College2023
Associate's Degree, Computer Information Technology
